AceClamp Snow Retention Solution for Membrane

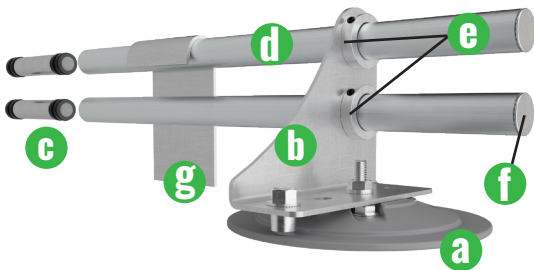

Save time and labor with the AceClamp pre-assembled snow retention solution for commercial roofing systems. The Snow Titan M Snow Rail, the Snow Bar System M & the Snow Titan Double Rail. All systems are engineered & tested to meet your specific load requirements. The innovative Universal Mount ensures unparalleled versatility and rapid installation, helping contractors reduce costs and maximize efficiency.

▼ SNOW TITAN-M ▼

- a. Universal Mount** | Compatible with every roof, arrives pre-assembled.
- b. Clamping Claw** | Holds rail in place until ready to “Titan”.
- c. Rail Connectors (1 & 2)** | Attach rails together for a continuous line up to 100’.
- d. Rails** | Robust 7.5’ rail that can span up to 48”.
- e. Ice Clip** | Snap in ice clip helps prevent snow & ice from sliding under the rail & distributes load.

▼ UNIVERSAL SNOW BAR SYSTEM ▼

- a. Universal Mount** | Compatible with every roof, arrives pre-assembled.
- b. Bracket System** | Available in 2 bar or 3 bar
- c. Couplers** | Joins bars together for a continuous line up to 100’.
- d. Bars** | 1” diameter Aluminum Tubing: 7.5’ in length.
- e. Collars** | Prevent lateral movement.
- f. End Caps** | Used to seal off the ends of tubing
- g. Ice Flag** | Screw-in Ice Flag installed on the bar between the mounts.
